Sequence 10254 Application US/09621976

Patent No. 6639063

GENERAL INFORMATION:

APPLICANT: Dunas Milne Edwards, J.B.

APPLICANT: Glordano, J.Y.

TITLE OF INVENTION: ESTS and Encoded Human Proteins.

FILE REFERENCE: GENSET.054PR2

CURRENT APPLICATION NUMBER: US/09/621,976

CURRENT PILING DATE: 2000-07-21

NUMBER: Patent.pm

SOFTWARE: Patent.pm

SEQ ID NOS: 19335

LENGTH: 147
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         US-08-232-463-14/C

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Description

Patent No. US2002015513A1

GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: ROBORT A. Sikes et al.
TITLE OF INVENTION: Isolation and Use of Fetal Urogenital
TITLE OF INVENTION: Sinus Expressed Sequences
FILE REFERENCE: 9901-007-999
CURRENT APPLICATION NUMBER: US/09/933,797
CURRENT FILING DATE: 2001-08-22
PRIOR APPLICATION NUMBER: US/09/482,933
PRIOR FILING DATE: 10909-05/14
PRIOR PILING DATE: 1999-05/14
PRIOR PILING DATE: 1999-05/14
PRIOR FILING DATE: 1998-05-14
NUMBER OF SEQ ID NOS: 811
SOFTWARE: FastSEQ for Windows Version 3.0
SEQ ID NO 133
LENGTH: 402
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Score 378.6; DB 9;

The oligomucleotide used to prime first strand synthesis contained the sequence tag AAGATATCAA between the Not I cloning site and dT18 stretch. The Rat Osteoblast tissue was provided by Lian & Stein of the University of Massachussetts Medical
                            Email: bento-soares@ulowa.edu

The sequence contained an oligo-dT track that was present in the oligonuclectide that was used to prime the synthesis of first strand cDNA and therefore this may represent a bonafide poly A tail. The sequence tag present in the cDNA between the NotI site and the oligo-dT track served to verify it as a clone from the normalized osteoblast library cDNA library Preparation: M.B. Soares Liab Clone distribution: clones will be available through Research Genetics (www.resgen.com) The following repetitive elements were found in this cDNA sequence: 1-22, >AT_rich#Low_complexity
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ö

/note="Vector: pAMP1; This library was created from
laser-captured isthmal cells from tox176 transgenic mice.
lst strand of cDNA was synthesized with reverse
transcriptase and oligo (dT) beads, then cDNA was amplified
by PCR using modified SMART primers. The final cDNA was
cloned in pAMP1 vector in annealing reaction with Uracil
DNA Glycosylase (UDG). Library constructed by Y.Korshunova
and M. Lovett. Library materials provided by Mills JC &
Gordon JI."
